

## Video Sentry Color Tilt Phone System

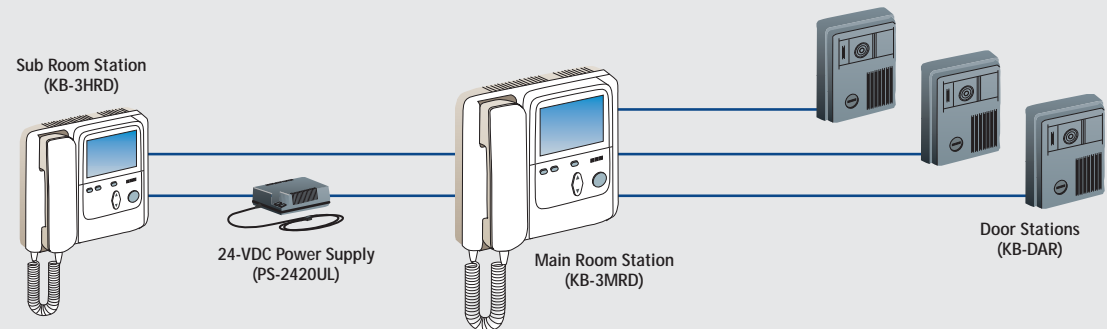

See who is at any door, from as many as  
five different locations, before you let them in.

## FEATURES

- Single 2-wire hookup uses your existing doorbell and buzzer wiring.
- CCD camera technology produces clear, sharp video images.
- Selectable chime options let you know which door your visitor is at.
- A broad range of options gives your system even more flexibility.
- Communicate with other internal locations using an All Call button; others can talk back to you with hands-free ease of operation.
- Unlock a door or gate with the push of a button.

*See who is at the door,  
whether you are at a Main Room or a Sub Room Station.*

## OVERVIEW

Monitor three outside doors from as many as five different inside locations with the Video Sentry Color Tilt Phone System.

When a visitor approaches one of your outside doors, a Door Station (KB-DAR) with "instant on" audio and video activates itself and chimes a preselected two, four, or eight times to alert you to check the monitor of your Main or Sub Room Station (KB-3MRD or KB-3HRD). A clear, sharp video image shows who's outside. Lift the handset to speak with your visitor, who can respond to you via the Door Station's hands-free speakerphone. With the touch of a phone button, you can unlock the door.

Install a Main Room Station at a central location, and position as many as four more Sub Room Stations where you need them. Each Main Room and Sub Room Station has a 4" flat color LCD. The farthest Sub Room Station can be up to 328 feet (100 m) from the Main Room Station. If you have four Sub Room Stations, you can substitute an Audio-Only Sub Room Handset (KB-3SB) at one of the locations.

Each station enables you to selectively call another station. You also can press the All Call button to communicate simultaneously with all stations.

Other easy-to-use controls enable you to activate a station's monitor and set its volume and brightness controls.

You also can tilt the Door Station's CCD chip camera up and down to gain a better view of your visitor. You can open all the doors at once or you can specify which door to unlock with the optional Selective Door-Release Adapter (RY-3DL).

The system also offers a range of optional attachments. The Picture Memory Unit (KC32EU), for example, enables you to keep a record of visitors and events. The Stainless Steel Housing (KA-DGR-PANEL) provides added protection for the Door Station. Specially made Deskstands (MCW-S and MCW-2S) save space and enhance the value and convenience of the system.

Get the system that's right for your application:

For an internal audio-video or audio-only station, order:

- Main Room Station (KB-3MRD)
- Sub Room Station (KB-3HRD)
- Audio-Only Sub Room Handset (KB-3SB).

To place an integrated video camera and speakerphone at an entryway, order the Door Station (KB-DAR).

You will need one 24-VDC Power Supply (PS-2420UL) for every two stations.

You may also need optional attachments, including the Picture Memory Unit (KC-32EU), Selective Door-Release Adapter (RY-3DL), and others.

## Why Buy From Black Box? Exceptional Value. Exceptional Tech Support. Period.

### Recognize any of these situations?

- You wait more than 30 minutes to get through to a vendor's tech support.
- The so-called "tech" can't help you or gives you the wrong answer.
- You don't have a purchase order number and the tech refuses to help you.
- It's 9 p.m. and you need help, but your vendor's tech support line is closed.

According to a survey by Data Communications magazine, 90% of network managers surveyed say that getting the technical support they need is extremely important when choosing a vendor. But even though network managers pay anywhere from 10 to 20% of their overall purchase price for a basic service and support contract, the technical support and service they receive falls far short of their expectations—and certainly isn't worth what they paid.

At Black Box, we guarantee the best value and the best support. You can even consult our Technical Support Experts before you buy if you need help selecting just the right component for your application.

Don't waste time and money—call Black Box today.

Item	Code
Video Sentry Color Tilt Phone System	
Main Room Station	KB-3MRD
Sub Room Station	KB-3HRD
